

QINGDAO HUIMIN PLASTIC INDUSTRY CO.,LTD

VACUUM THERMOFORMING FILM

Good wrapping, high-density and high barrier, with customizable specifications

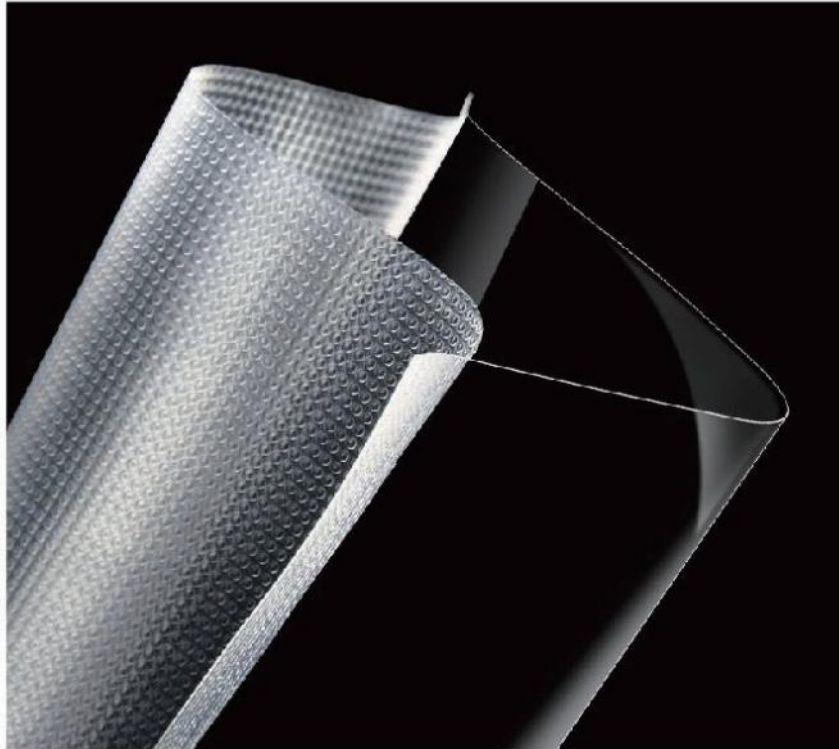

Printed Rollstock Film With Various Materials

Plain/Smooth Vacuum Bag For Chamber Vacuum

With PA/PE Laminated or Co extrusion film. High Barrier ,Good Performance on Frozen, Retort Purpose etc

TEXTURED/EMBOSSSED VACUUM BAG

Seven layer co extrusion, puncture resistance, good toughness, compression resistance, strong sealing, and freeze resistance

ROLL/TUBE BAG

Puncture resistant, good toughness, uniform dots, compression resistance, strong sealing , Suitable for various machines, no odor

PE BAG

With LDPE material , slide ziplock, single ziplock, double ziplock Etc

COLOR MATTE ALUMINIZING BAG

Frosted aluminum plating process, exquisite workmanship, a variety of colors to choose from, applicable to a wide range of scenes.

COLOR ALUMINIZING BAG MATTE WINDOW

Colored rounded windows for more exquisite product display, with aluminum plated material on both sides for stronger shading, widened bottom design for stable standing

KRAFT POUCH

Thickened material, moisture-proof, and sealed

ALUMINIUM FOIL THREE SIDE SEALED

No odor, good light resistance, strong sealing,
can be customized

ALUMINIUM FOIL RETORT BAG

High temperature cooking, four layers compound, resistant
to high temperature of 121 degrees

LIQUID BAG

The use of thickened material explosion-proof bags strong pressure resistance can stand.

OTHER PRODUCTS

LDPE ziplock bag

Transparent stand-up bag

Retort bag

Aluminizing back clear front Doybag

Clear-Aluminizing three sides sealed

Shrink bag

Vacuum bag

AL foil side gusset&stand-up bag

Eight side sealing bag

Beer bag

Thermoforming film

Aluminum foil cooking bag

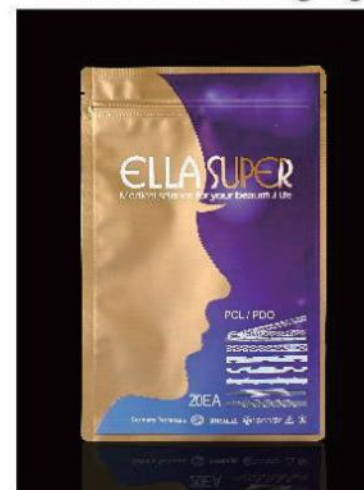

Back clear front stand up bag

Coffee bag

Aluminum foil bag

Aluminum foil zipper bag

NINE-COLOR HIGH-SPEED PRINTING MACHINE

Electronic axis - horizontal, vertical computer automatic registration, secondary printing computer automatic plate, accurate copy, efficient and material-saving counter-plate rack, can be synchronized forward and reverse printing, can be printed UV matte oil, scratch code, so that the packaging is more beautiful and practical quality assurance, first-class online detection system so that the defective products have nothing to hide.

SEVEN LAYER CO EXTRUSION FILM BLOWING MACHINE

Seven layers of co-extruded film's advantages:oil, moisture and low temperature freezing resistance, quality and freshness,odor preservation,high lamination, high tensile strength,low cost ,high strength, small capacity ratio,flexible structure,a wide range of application.

SOLVENT-FREE LAMINATING MACHINE

Advanced environmental protection solvent-free laminating machine, mature technology, green products, more safe.

After 24-72 hours in a constant temperature curing room, the laminated materials have high strength between layers, cannot peel off easily

AUTOMATIC BAG MAKING UNIT

More than 80 sets of high-speed automatic bag making machines - eight side seal bag-making machines - 700 type middle seal machines - 1400 type three side seal bag making machines - die cutting process - zipper bag-making machine - shaped, oversized bags all get through.

OFF-LINE INSPECTION MACHINE

High stability, high speed, high accuracy, high detection speed of up to 300m/min, a width of 1200mm, minimum detection of 0.15mm, 100% defect detection, covering all types of defects, including overprint, knife silk, off-color, leakage, flying ink, foreign objects, etc.
